Pressure-resistant electrodes InPro 3100

For applications in the biotech and pharmaceutical industries. With PT 1000 temperature sensor for automatic temperature compensation. For fast and accurate measurements even after repeated autoclaving and sterilization cycles at 140 °C.

- -With silver ion barrier for measurement of sulfide-containing samples
- -Low maintenance
- -Can be used up to 6 bar pressure
- -Reference system: Argenthal®

Please order connection cable separately.

Diaphragm:	Ceramic
Connection plug:	VP plug head
Shaft Ø:	12 mm

Type	Max. pH value	pH range	Max. temperature °C	Temperature	Temperature sensor	Shaft length mm	Material s
InPro 3100/120/PT100	14	14	140	140 °C	Pt 100	120	Plastic
